Personal Projects

Automating Process In spareParts

It's a **web application** for import and export spare parts made by using **CSS**, **HTML**, **Python**, **SQL**

Final Year Project Management System

This system is for keeping track for projects and progress of final year students on these projects. This **Desktop Application** is made in **C#** and **SQL**.

Travel Planner

Travel Planner is just like **Google Map**. It is used to find the best route, shortest path and distance between two points. This project is developed using **Flutter** and **Dart**

Book Store Management System

Book Store Management System is both **Console Base Application** and **Desktop Application**. I made this Application in **Python**, **C++**, **C#**

Zombie Game

I developed this game in **.NET framework** by using **C#**
